Evolv Express[®] Transforming Venue Ingress

The **fastest, most convenient, and most effective** venue ingress screening system available today

At busy times, most stadiums, ballparks, and arenas have long entry lines, creating fan frustration and a bad first impression.

Evolv Express changes that reality.

After installing Express units, multiple MLB, NFL, and MLS teams have transformed their fan arrival experience.

Lines have been all but eliminated. Fewer gate staff are required. And, most importantly, fans enter happier, with more time to visit concession stands and restrooms before getting to their seats. This dramatic improvement has been accomplished with no reduction in security effectiveness. It's a better outcome for fans, for security,

Fastest

- 4X to 8X higher throughput than legacy systems
- Guests walk through continuously in groups at natural pace
- Same or more capacity in much less square footage

Most Convenient

- Personal items remain in pockets and bags
- Touchless
- Very few false alerts

Most Effective

- Integrated system of people, process, and technology
- Most effective detection of crowd threats
- Build-in data, analytics, and insights tools
