

Personal Safety App

Evolv Eva™

People Want to Feel Safer in Their Everyday Lives

In today's hectic work environment, employees are often on-the-go, whether moving between company locations, client sites, transit hubs, or caring for someone in their home.

Whether they're walking, using a car service, or navigating public transportation, there are times when they may encounter situations that make them feel unsafe—like being followed or noticing unusual behavior from others.

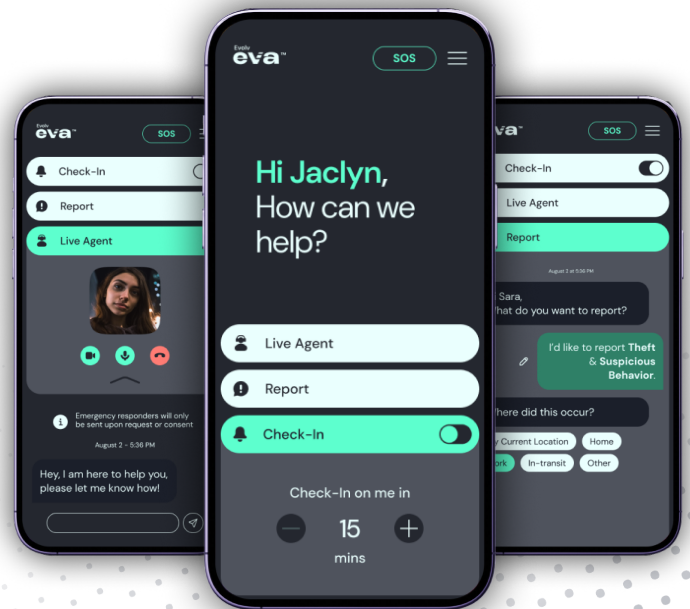

While consumer-focused personal safety apps offer some level of awareness and security, most solutions don't fully address the specific needs of businesses and organizations, especially in sectors like healthcare and education.

Evolv Eva Personal Safety App for Businesses

Evolv Eva™ is a personal safety app for staff in healthcare, education, sports venues, industrial workplaces and other industries that aims to support both the individuals and their organizations. Evolv Eva is designed to provide intelligent automation, live agent assistance, and a safety network to help people feel more secure in their everyday lives.

Evolv Eva is part of the Evolv Safer Experience System™, a connected and layered approach that integrates people and technology to help deter, detect, and orchestrate response to physical security threats. Unlike standalone products, the Safer Experience System combines brandished firearm detection, concealed weapons detection, a personal safety app, and data analytics into a unified security infrastructure. The Evolv Express® concealed weapons detection solution is trusted by over 800 customers worldwide and has screened over 1 billion people since 2019.

The Key Features and Benefits of Evolv Eva

For Individuals

Evolv Eva offers several capabilities that aim to allow users to take proactive control of their personal safety on-the-go. These include:

Check-In Intervals: Users can set up check-in intervals and will receive a notification at the end of the defined time. If they fail to respond to the notification, a live agent will follow up and take further action, as needed.

Live Agent Assistance: Evolv Eva provides 24/7 access to a live agent to assist when users feel unsafe. Agents can help guide users to safety, stay on the line with them, and connect users to emergency services as needed. Users can contact an agent via text, video, or audio call from the Eva app.

Safety Circles (Coming Soon): Users can set up their personal safety circle of friends, family, colleagues, and managers who they can communicate with confidentially and can be notified automatically if a safety incident occurs for that user.

Report an Incident: Users can anonymously report any security incidents or concerns to their security team via the Eva app. The security team can choose what action to take. This helps reduce call volumes and allows actionable insights to be pulled from the report data over time.

For Organizations

Evolv Eva is designed to be a personal safety app for businesses. As such, it provides a few key benefits that consumer safety apps generally don't offer. These include:

Scalability: Eva is designed to scale with large organizations, supporting unlimited users and safety circles.

Structured Incident Reporting: Eva's structured and anonymous reporting system is designed for organizational use, enabling security teams to gather data and respond to recurring issues.

Administrative Dashboard & Analytics: Eva's administrative dashboard offers comprehensive insights into app usage, live agent usage, safety incidents, and trends, allowing organizations to monitor and improve their security posture.

Custom Branding & App Configuration: Eva can be white-labeled and customized to reflect the customer's branding. It also allows customers to select which features to turn on or off.

Security Infrastructure Integration (Future): Eva will integrate with your existing security infrastructure to enable a holistic view of your environment and a more coordinated response to security incidents.

About Evolv Technology

Evolv Technology (NASDAQ: EVLV) is designed to transform human security to make a safer, faster, and better experience for the world's most iconic venues and companies as well as schools, hospitals, and public spaces, using industry leading artificial intelligence (AI)-powered weapons detection and analytics. Its mission is to transform security to create a safer world to work, learn, and play. Evolv has digitally transformed the gateways in places where people gather by enabling seamless integration combined with powerful analytics and insights. Evolv's advanced systems have scanned more than a billion people since 2019. Evolv has been awarded the U.S. Department of Homeland Security (DHS) SAFETY Act Designation as a Qualified Anti-Terrorism Technology (QATT) as well as the Security Industry Association (SIA) New Products and Solutions (NPS) Award in the Law Enforcement/Public Safety/Guarding Systems category. Evolv®, Evolv Express®, Evolv Insights®, and Evolv Visual Gun Detection™, Evolv eXpedite™, and Evolv Eva™ are registered trademarks or trademarks of Evolv Technologies, Inc. in the United States and other jurisdictions.
