

SHARED SITUATIONAL AWARENESS FOR PUBLIC SAFETY AND SCHOOLS

COMMANDCENTRAL AWARE + RAVE MOBILE SAFETY PANIC BUTTON

CHALLENGES

When an emergency happens at your community's most vulnerable locations, getting the right information into the right hands is crucial. Any delay in incident response can have devastating consequences. Law enforcement and school systems have siloed information sources, making it difficult to share critical information in real time. Responders need eyes on scene quickly in order to provide a more informed response. When every second counts, you need a solution that works with you.

BENEFITS

RECEIVE PANIC BUTTON ALERTS

Receive real-time alerts of a panic button press on the CommandCentral Aware map along with 9-1-1 calls, nearby cameras, units and other resources and events for better situational awareness.

VIEW TYPE OF INCIDENT

See details on the panic alarm including type of incident (active assailant, fire, police, 9-1-1) as well as the GPS coordinates, campus location, time stamp and activator profile information.

LIVESTREAM NEARBY CAMERA FEEDS

Remotely livestream camera feeds from surrounding locations to assess the situation faster and provide a more informed response.

SOLUTION

The Rave Mobile Safety Panic Button and CommandCentral Aware together is a seamless solution to help keep your schools and community safe. The Panic Button triggers an alert that is immediately centered on the CommandCentral Aware map alongside customizable layers including your campus or building map and other geospatial intelligence sources. CommandCentral Aware receives the alert, including GPS coordinates, activator's profile and type of incident. Your agency can remotely livestream nearby camera feeds to get eyes on the scene faster.

FEATURES

CUSTOMIZE ALERTS

Adjust the icon, sound, priority of alerts (e.g., set proximity to a school) and personnel notified based on your workflow.

INTEGRATE FLOOR PLANS

Upload floor plans to display on the map and filter between layouts.

TAILOR BUILDING/CAMPUS CAMERAS

Plot and configure camera location, name and alias based on building or campus environments.

COMMANDCENTRAL AWARE + RAVE PANIC BUTTON IN ACTION

1. A dispatcher sees an alert on the CommandCentral Aware map from an activated Rave Panic Button at a local school of an unknown intruder.
2. They also see a 9-1-1 call alert. They create an incident in PremierOne CAD which too populates on the map and initiates outbound communications.
3. The dispatcher radios the school resource officer (SRO) with details.
4. In CommandCentral Aware, the dispatcher receives and views school floor plans and maps to precisely direct the SRO to the panic alert location.
5. The SRO is able to intercept the intruder and mitigate the potential threat without incident. The subject is escorted off premises.

Integrations with third party mobile panic buttons with CommandCentral Aware are available.

MOTOROLA SOLUTIONS

We're reimagining the world of public safety. Our mission-critical ecosystem integrates communications, software and video on a single platform to amplify connectivity between technology and teams. By integrating CommandCentral Aware and the Rave Panic Button, we're helping ensure responders, command staff and records personnel immediately use accurate data collected in the field and resolve incidents quickly. When everything works together, safety is unstoppable.
