

VIQI BASIC VOICE CONTROL

CHANGE RADIO SETTINGS USING SPECIFIC VOICE COMMANDS ON YOUR APX N50 OR APX N30

DETAILS

While it's easy to change settings on your APX N50 or APX N30 using the traditional hard controls, there are situations where you are unable to scroll through radio settings or need to keep your eyes up and stay focused on your environment.

Using ViQi Basic Voice Control, you can operate the radio with your voice. From switching between popular channel and zone presets, to adjusting the volume, to changing your audio profile, all you need to do is press and hold the preprogrammed ViQi button, and speak into the mic.

There are 10 available actions, each accessible using specific voice commands that perform well in high-noise environments. The ViQi function can be assigned to any other programmable button when the three dot purple button is not preferred.

BENEFITS

Radio users do not have to look down or concentrate on the position of the hard controls. All changes can be done eyes-up and without distraction.

COMPATIBLE PRODUCTS

APX N50 & APX N30

DEPENDENCIES

Radio Firmware: R01.00.00 or later.

INFRASTRUCTURE IMPACT

None.

SECURITY

ViQi button must be pressed when commands are issued. There is no "wake word" requiring an open mic.
